Subject: FW: Humanity of the unborn

Alicia found out this bill made it to Governor and I am very concerned about some things that were added since the last time I saw it. They did add the statement regarding "contingent on the availability of funds" but created a revolving fund based on warrants issued against claims filed to fund the education portion (Section 4) of the bill.

Include information on accessing prenatal health care; provided, **no program or state employee** may refer any student to a medical facility or any provider for the performance of an abortion; **This statement is in direct opposition to Title X requirements. Title X requires us to provide information on where termination services can be accessed.**

There are several other sections about annual reporting and the public bathrooms that we have been concerned about that are still there as well as providing technical assistance to community organizations.

This is interesting: Provide technical assistance to help community-based organizations in the planning and implementation of **abortion prevention**, alternatives to abortion referral and education programs regarding the humanity of the unborn child; BUT

Also – "Include no component of human sexuality education other than those included in science education standards".

Hey Jill, this is with the governor. It looks even more detailed than before.
